34 You're in luck! Achieving gender equality is now at the core of all of the EU's policies.

Your government have just invested in gender budgeting so that all girls can have a secondary education.

32 You're falling behind! You want to be an engineer, but society doesn't think this is a job for a woman.

30 As a girl, there's a 30% chance you will experience gender-based violence in your lifetime.

24 You are losing out because 1 in 5 adolescent girls are out of school.

28 Climb the ladder! Gender-sensitive funding means your community and government are investing in education, prevention and safety for girls.

27 Go back a few paces. Many girls don't have access to contraception, so you're more likely to experience an unintended pregnancy.

29 Take a back seat. As a girl, your voice is not heard because girls' opinions are not taken seriously.

14 Progress! You can now access the health services you need thanks to gender-sensitive funding!

16 Success! Society prioritises equal access to funding, empowering girls as agents of change.

13 Not so fast! At the current rate of change it will take 80 years for the gender pay gap to close completely.
